

A Multi-modal, Scalable Solution

Survent Power

Interview Anyone Anywhere

Interview who you want where ever they are, in which ever language they prefer - all are supported.

And manage your sample by concurrently across 24 timezones.

What limits?

Survent surveys can include up to 1 million questions.

Single question limit: 1,000,000 characters.

Sample files can have up to 10 million records.

Now with more CATI capacity per server - 300% increase.

Up to 999 phone statuses.

Supervisor Updates

Including **webSuper**, a GUI shop supervision tool for changing and adding sample, managing interviewers, and reporting real time study data.

New: control terminal-mode stations, too!

New: add, delete, and prioritize sample on the fly.

New: market reports - across sample, suspend reports and more.

New for AAPOR studies: Syntax for AAPOR CATI dispositioning

Solutions for Research since 1967

New Release Features Integrated Celeus Dialer

CfMC has played an active role in their development and support since the earliest of prototypes.

Survent v8.3 marks the first integrated solution with a CfMC predictive and power dialer. And we're just getting started.

Features of Celeus, the CfMC Dialer Solution

| | |
|--|--|
| power and predictive modes | sound playback |
| audio monitoring | adjustable abandonment rates |
| flexible inbound and outbound dialing configurations | dual-stream recording - whole interview AND start/stop |
